NAME: KAMESH S
REGISTER NUMBER: 231401045

Ex.No:5	**Study of Agile project management tools.**

Aim:

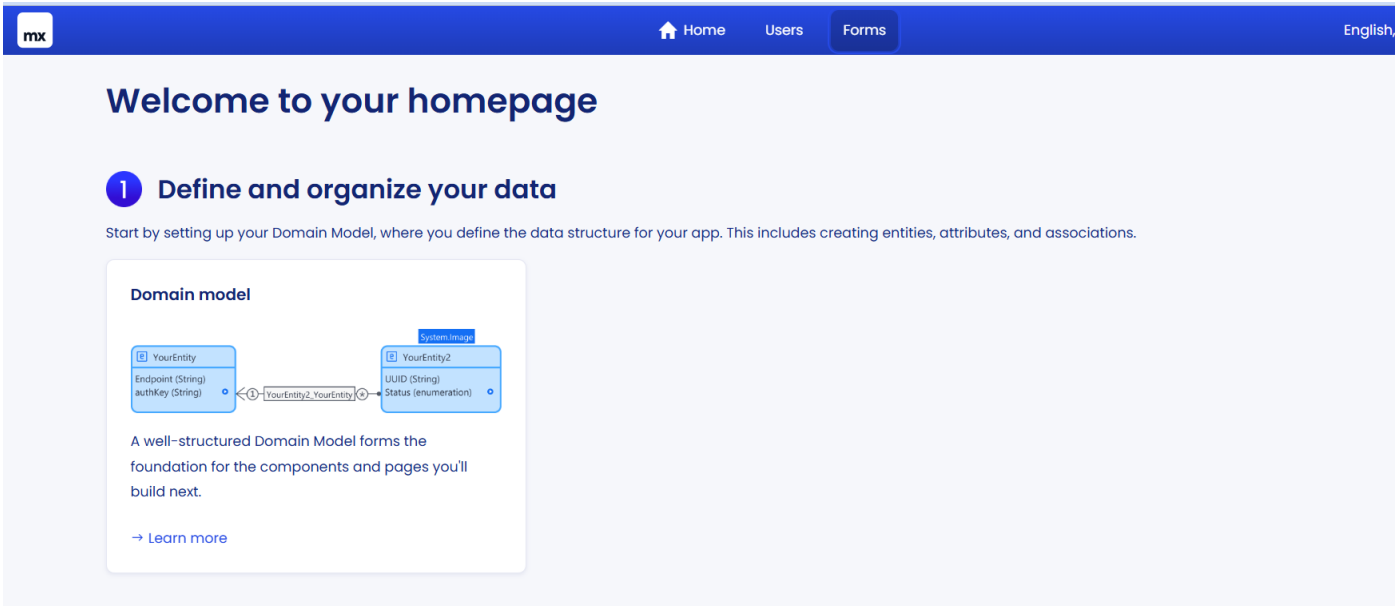

To manage the Automated Form-Filling System using IT Project Management techniques and Agile Project Management tools.

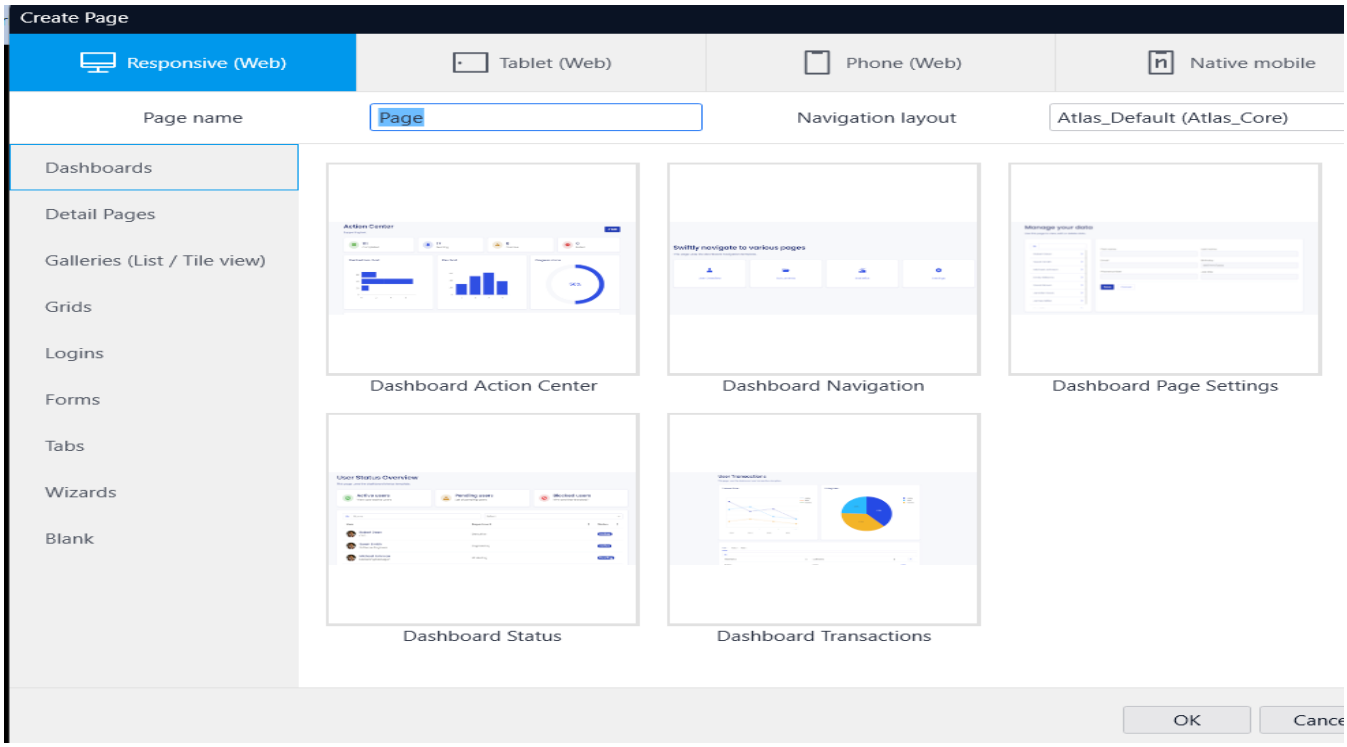

Procedure:

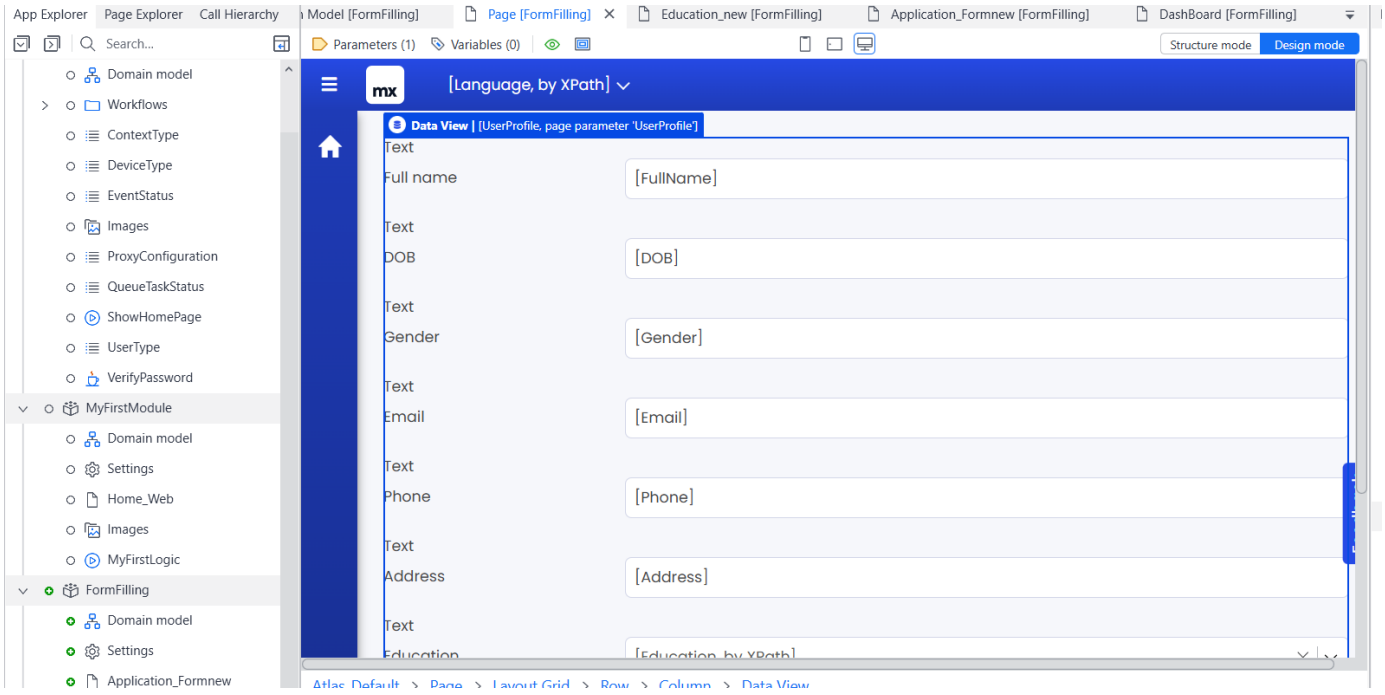

1. **Select an Agile Project Management Tool**
   Select an open-source or freely available Agile project management tool such as **Taiga, OpenProject, or Jira**.
2. **Create a Project**
   Create a new project and enter the project name, description, team members, and project objectives.
3. **Create Product Backlog**
   Identify the project requirements and add them as **User Stories** or tasks in the product backlog.
4. **Prioritize User Stories**
   Arrange the backlog items according to their importance and assign priorities such as **High, Medium, and Low**.
5. **Create a Sprint**
   Create a sprint with a fixed duration, usually 1–4 weeks, and select the required user stories from the product backlog.
6. **Assign Tasks**
   Divide each user story into smaller tasks and assign them to the respective team members.
7. **Track Task Progress**
   Use an Agile **Kanban/Scrum board** with columns such as:
8. To Do
9. In Progress
10. Testing
11. Done
12. **Monitor Sprint Progress**
    Track completed and pending tasks using the sprint board, progress indicators, or burndown chart.

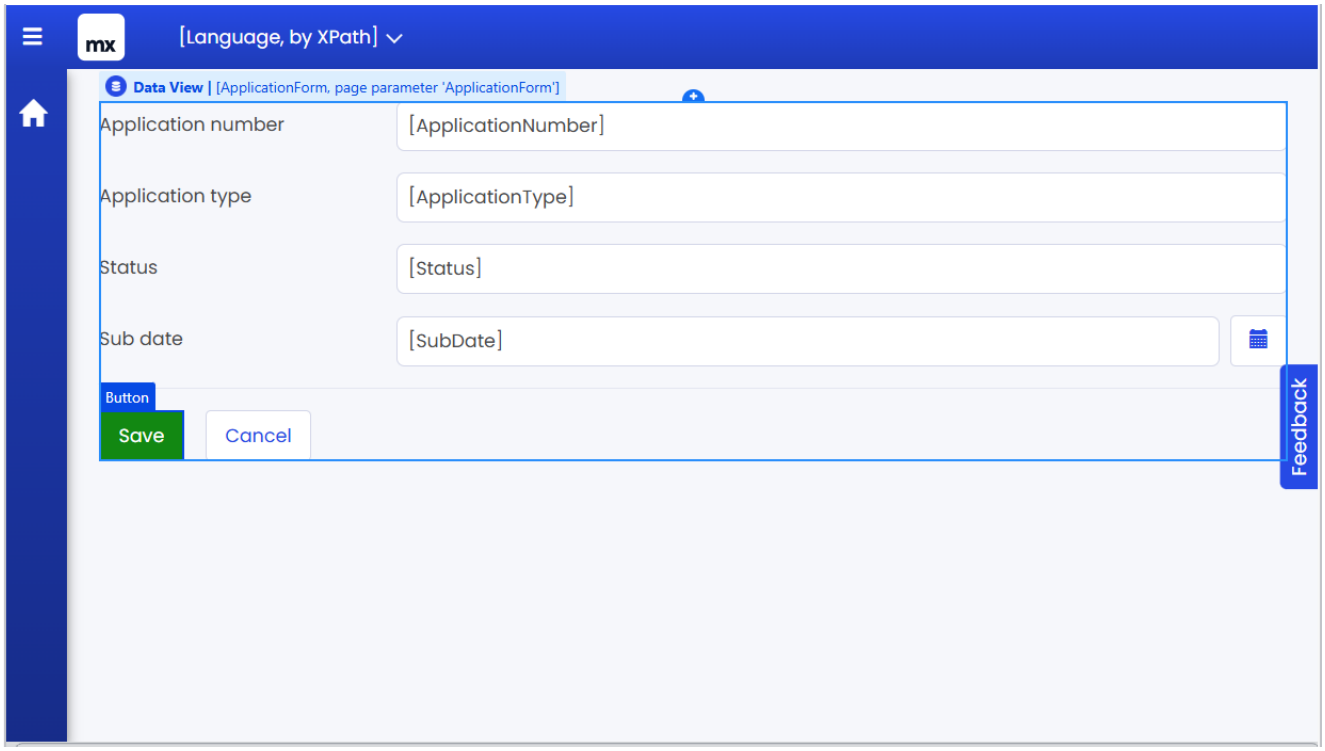

13. **Conduct Daily Stand-up**
    Review what was completed, what is currently being worked on, and any issues or blockers.
14. **Perform Sprint Review**
    At the end of the sprint, review the completed work and demonstrate the developed features.
15. **Conduct Sprint Retrospective**
    Identify what went well, what went wrong, and what improvements should be made in the next sprint.
16. **Generate Project Report**
    Review the project status, completed tasks, pending tasks, sprint progress, and overall project performance.
